SUMMARY

Bilingual biology senior (B.S. expected December 2026) with four years at Apple, closing in the Vision Products Group running user-research and sensor data-capture sessions under detailed research protocols. Experienced with wearable and spatial computing hardware, participant facilitation, live technical troubleshooting, and protocol-driven data quality. Grounded in consumer medical-device data quality and patient education from counseling customers on Apple Watch health features (AFib History, fall detection, sleep tracking) with their doctors. Seeking a one-year research appointment in medical device interoperability at FDA CDRH.

EDUCATION

Florida Gulf Coast University, Fort Myers, FL

Bachelor of Science in Biology, Pre-Professional / Pre-Med Concentration - expected December 2026

Relevant coursework: General Microbiology, Biological Statistics, Biochemistry, Human Pharmacology, Medical Seminar

RESEARCH AND DATA EXPERIENCE

Apple - Vision Products Group Career Experience, User Research and Data Capture | Sunnyvale/Cupertino, CA | June - December 2025

- Facilitated high-volume participant sessions across multiple device configurations while following detailed research protocols and protecting data quality.
- Directed video, photo, and sensor-capture sessions using spatial depth and optical tracking hardware, coaching participants on positioning and movement to isolate motion artifacts and produce consistent, usable data.
- Troubleshot hardware, software, and data-logging issues during live sessions and raised environmental friction and hardware gaps found during mock runs.
- Coordinated across time zones with engineering teams in China and human-factors partners to meet capture schedules and quality standards.
- Identified protocol confounds during capture sessions and processed 400+ study photos, with the resulting human-factors fixes adopted by the team.

Florida Gulf Coast University - Research Project Coordinator and Data Lead | Fort Myers, FL | May - December 2024

- Coordinated a student research team around laboratory protocols, documentation, and systematic data collection.
- Organized raw datasets and image-analysis workflows in ImageJ and Excel and presented findings to faculty panels.

HighFive - Contract AI Video Data Contributor | Remote | 2026 - Present

- Capture structured smartphone video for AI-training datasets under project-specific optical capture protocols; run data validation on framing, continuity, and protocol compliance, flag edge cases, and support project onboarding before submission.

INDEPENDENT SYSTEMS INTEGRATION PROJECTS

Home Server and Agentic Automation Lab | 2026 - Present

- Built and managed a home server environment for agentic automation, integrating AI agents, Home Assistant, remote device bridges, and automation pipelines across platforms.
- Test and maintain interoperability between local models, cloud services, IoT devices, and Apple and Windows endpoints over network protocols and REST APIs, checking sensor-to-endpoint fidelity and troubleshooting data flow and reliability across the stack.

ADDITIONAL PROFESSIONAL EXPERIENCE

Apple - Product Specialist | Business Team Support | Onboarding Facilitator | Estero, FL | November 2021 - December 2025

- Explained products, services, and technical workflows to English- and Spanish-speaking customers and business accounts.
- Supported Apple's Business Team for three years, matching technology to real workflows and coordinating follow-through with store partners.
- Led CORE onboarding sessions for new hires and coached peers on consistent technical execution.
- Served as the store's titled Vision Pro expert and go-to leader for questions on the device, delivering full individual and group demo sessions and making spatial-computing concepts understandable to first-time users; on day one of the role, reported hands-on experience and feedback to corporate that became an implemented feature.
- Worked with separate Apple marcom teams on photo and video shoots as an active contributor - demonstrating, consulting on creative direction, teaching the set, validating scripts, and making changes in real time.
- Introduced fashion stylists to a shared Freeform board workflow on iPads for reviewing design images, replacing a texting group chat.
- Counseled customers on using Apple Watch health features with their doctors - AFib History (PPG), fall detection for seniors (IMU/accelerometry), sleep tracking - making sure sensors were enabled and logging the right data at the right time; consumer medical-device data quality and patient education.

TECHNICAL SKILLS

Sensor & Hardware Platforms: Apple Watch (photoplethysmography/PPG, inertial measurement units/IMU accelerometry) | Apple Vision Pro and Meta Quest (spatial depth and optical tracking) | physiological and motion artifact isolation | local IoT hardware integration | macOS, iOS, Windows

Data & Computing: R/RStudio (data wrangling, ggplot2, statistical modeling) | Git/GitHub version control | Docker containerization workflows | network protocols and REST APIs | ImageJ | Microsoft Excel and Google Sheets

Laboratory & Protocol Execution: research protocol execution | participant facilitation | good documentation practices (GDP) | data verification and validation | live technical troubleshooting

LANGUAGES

English and Spanish (bilingual).

CLINICAL EXPOSURE

MediFutures - Clinical Shadowing | 40+ hours

Innovative Dermatology and Mohs Surgery - Dermatology Shadowing with Vanessa Lancaster Levine, NP-C | August 2024

- Observed mole removals (SK evaluation), wart removals, electrodesiccation and curettage (ED&C) for superficial skin cancer, Mohs surgery (98% clearance rate), liquid nitrogen cryotherapy for pre-cancerous lesions, phototherapy for vitiligo, and cosmetic Botox/filler consultations.

LEADERSHIP AND SERVICE

FGCU Pre-Medical Association, Social Media Committee Lead | Familia@Apple Diversity Network Representative | Community volunteering in environmental restoration, youth mentoring, and local outreach

Christian Medical Ministries - Volunteer Tech Counselor: coordinated Google and Apple Maps support, Photoshop and print materials, and donation drive operations, as well as patient outreach

Global Medical Brigades - Guatemala chapter meeting exposure: low-resource triage and mobile clinic model

Florida Department of Health Volunteer Health Care Provider Program - Chapter 110 Eligibility and Referral Specialist training | 2023
